

Multiguard Trial Test Results

Field trial at Ballina Council

Multiguard has been in place for over 7 months at Ballina Council, and has passed its trials.

This is Multiguard newly installed on an older in-ground hydrant at Ballina Council. The pipe has been dug out on this one, but this does not always need to be the case: if the hydrant is centred well, it will not be necessary to dig out anything. Multiguard will slide straight on.

Another Multiguard installed at Ballina Council. The only dirt visible is from installation (installed November 2020). This is Multiguard at work 7 months after installation.

Multiguard is easy to install on previously installed hydrants and stops ants from filling the hydrant well. No water shut-off is required.

Councils and water authorities trialling Multiguard

Likely to proceed to full adoption upon successful completion of trials.

Richmond Valley Council	Trialling
Port Macquarie Council	Trialling
Nambucca Council	Trialling
Ballina Council	Trialled / now in use
